

I strongly support limiting the number of media outlets in any area that can be owned by one entity. I believe the quality and the diversity of programming and information available deteriorates when the sources of that programming and information are consolidated. This regulatory change is an excellent example of the limited views available, as I have only heard any news coverage of the important proposed changes from public radio.

I also ask you to extend the public comment period, and hold another public hearing on the proposed changes.

Thank you for your attention and the opportunity to comment.
